FOR IMMEDIATE RELEASE

Marc Marcel Releases Groundbreaking Projects After Near-Fatal Experience

Los Angeles, CA — Visionary spoken word artist Marc Marcel, known for his prolific contributions to poetry, philosophy, and consciousness, has emerged from a life-threatening event with three major creative projects that showcase his resilience and artistic evolution: ***The Greatest Poet Rockstar Spoken Word Artist that Ever Lived*** his new book ***Bump***, and the animated satire ***Gurus the Meta Movie***.

In February 2021, Marcel was aboard United Flight 328 when an engine exploded shortly after takeoff, forcing an emergency landing. Among his belongings was his unreleased poetry album, ***The Greatest Poet Rockstar Spoken Word Artist that Ever Lived***, a powerful collection that nearly went unheard. The album blends raw emotion and philosophical musings, offering listeners a poignant journey through resilience, survival, and creativity.

"I made peace with everything on that plane," Marcel recalls, "but realizing my albums were onboard, I begged for my life." The album opens with These Poems, featuring the pilot's mayday call, and includes standout tracks like One Hell of a Day, Schizophrenia, and 14 Billion Years, exploring existential themes, spirituality, and the human condition.

Alongside the album, Marcel has released his highly anticipated book ***Bump***, which delves into his personal journey with ketamine and its impact on consciousness. ***Bump*** blends memoir, philosophy, and psychedelics, offering readers insights into the transformative power of ketamine in both therapeutic and recreational settings. Marcel uses his own experiences to explore the intersection of psychedelics with modern culture and ancient wisdom.

"***Bump*** is more than just a recounting of psychedelic experiences," Marcel explains. "It's a meditation on existence and the layers of consciousness we rarely access."

Capping off these major releases is ***Gurus the Meta Movie***, an animated satire featuring history's greatest philosophers in a mind-bending, comedic narrative. After surviving the plane incident, Marcel found new inspiration to complete this decade-long project. The film combines wit, philosophy, and humor to challenge contemporary societal issues, all while presenting a visually stunning, thought-provoking ride through time and space.

"***Gurus the Meta Movie*** is the best thing I've ever created," Marcel reflects. "It's a celebration of life and a playful journey into the minds of the world's greatest thinkers."
